Centerpiece™ Roman Shades

Program Reference Guide
January 2022

Date	
1/29/2021	Pg. 30: Discontinued F0248 Wispy Stripe from the Blake collection
2/5/2021	Pg. 30: Roman Day & Night: Discontinued Roller Solar Screen collections AB600 (5%), AB600 (8%) & W120 (12%)
6/15/2021	Roman Day & Night: Discontinued roller fabric color F0881 Mink
7/15/2021	Pg. 25: Discontinued F0240 Pure White from the Blake collection, and F0226 Old Silver from the Rochelle collection

8/1/2021	Pg. 8: Added shade style notes
	Pg. 10: Updated translucent liner; added liner and lift system info
	Pg. 11: Updated max shade width without seams
	      Updated F0031 Black Gingham max height when railroaded
	      Added size consideration notes
	Pg. 15: Revised railroad & seaming info
	Pg. 17, 19: Updated side by side requirements: same valance return type
	Pg. 30: Roman Day & Night: Discontinued roller fabric color F0819 Espresso, Luxe
	Pg. 32: Added complete fabric pattern info on Sag Harbor

8/15/2021	Pg. 11: Revised Black Gingham max height table Pg. 25: Discontinued F0257 White from the Sheer Elegance collection
9/15/2021	Pg. 22: Updated max fabric width to 122" for F0245 Cameo, Blake
10/15/2021	Pg. 22: Added phase-out fabric status note on F0245 Cameo, Blake Pg. 25: Discontinued F0212 Wheat from the Taylor collection
11/19/2021	Pg. 24: Fabric notice: Libeco fabrics Optic White 0020 & Silver 8045 are currently unavailable. Pg. 25: Discontinued F0139 Natural White from the Valencia collection Pg. 26-31: Added Fall 2021 roller fabric availability for Roman Day & Night shades
Effective 1/1/2022	Pg. 25: Discontinued F0245 Cameo from the Blake collection & F0225 Silk White from the Rochelle collection Pg.26: Roman Day & Night: Discontinued roller fabrics F0855 Redwood in the Sumatra collection & F0904 Palm in the Sheer collection

Table of Contents
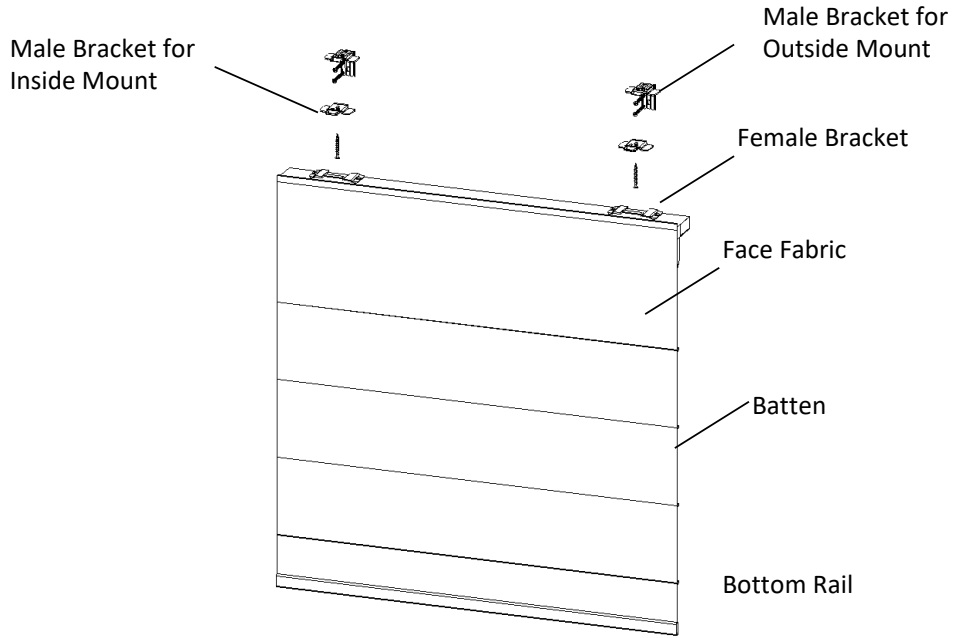

- Customize your view with quality, innovation and versatility that makes it a true icon of style.

- A world of fabrics: Handcrafted from the finest quality fabrics, previously available only through custom draperies, from muted grays, pastels and earth tones, to the luminousness of luxury silk, to the latest in heritage-inspired embroidery and weaves.

- Luxury fold options: Choose Flat Fold or a polished look rooted in simplicity, so perfect it harmonizes with virtually any décor. Or choose Soft Fold featuring a distinctive tear drop contour that adds fullness.

- Light Control: Choose from Translucent or Blackout Lining with any fabric for optimal light and privacy control

- Better insulation: The unique system comes with additional lining, working as an extra layer of insulation for your window.

- Various lift systems: Cordless, Continuous Cord Loop and Motorization

- AeroLite™ Cordless Lift System
    - Patented Technology: AeroLite™ cordless lift system enables easy raising and lowering of the shade with ultra-premium cordless control. When raising and lowering, the lift system delivers a smooth experience that's also quieter and more dependable.
    - Easy and intuitive control: To lower, gently pull the concealed shade handle downward to lock it into place. To raise gently pull the handle downward and let the shade rise automatically to the desired position and lock.
    - Convenient and safe: The cord- free design eliminates unsafe and unsightly cords to ensure optimum child and pet safety.

Shade Styles & Banding Options

Shade Styles

Flat Fold without Seams

- Slight light leakage may be seen through pin holes for select fabrics.
- Not available in the Rochelle collection

Flat Fold with Batten Back

- Ideal for room darkening solutions

Soft Fold

- Ideal for room darkening solutions
- Not available in Sheer fabrics

Shade Banding Options, for Flat Fold with Batten Back

Ribbon Banded
Flat Fold with Batten Back

- Available in select fabrics only
- Available in all lift systems; not available in Day & Night applications
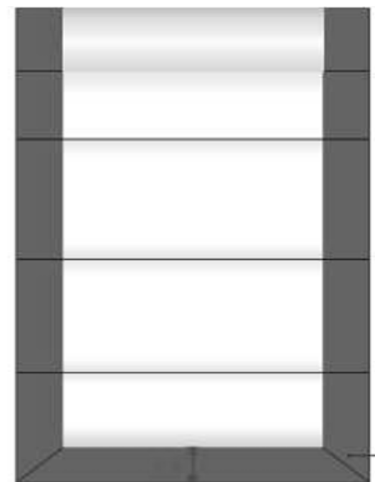

Edge Banded
Flat Fold with Batten Back

- Available in select fabrics only
- Available in all lift systems; not available in Day & Night applications

Shade Styles & Banding Options

Ribbon Banded

- Available in all lift systems except for Day & Night applications.
- Only available in Flat Fold with Batten Back (not available in Soft Fold and Flat Fold with no seams)
- Not available with a common valance
- 1 1/16" ribbon decorate tape along the edges at 2"
- Only available in following fabrics:

Available Fabrics

Fabric	Color Code	Color Name	Fabric Width
Taylor AA0305	F0210	Corn Silk White	60"
	F0218	Slate Gray	60"
Ella AB0203	F0175	Washed White	57"
	F0176	Oatmeal	57"
	F0177	Linen	57"
	F0178	Java	57"
	F0179	Graphite	57"

Available Ribbon Decorative Tape Colors

Color Code	Color Name
T001	White
T002	Ivory
T169	Grey Beige
T201	Black
T402	Light Cocoa
T5124	Dusty Grey

Edge Banded

- Available in all lift systems except Day & Night applications
- Only available in Flat Fold with Batten Back (not available in Soft Fold and Flat Fold without seams)
- Border size: 2.5"
- Not available with a common valance
- Only available in the Lakeside collection

Available Fabrics
(Lakeside Collection)

Fabric Code	Color Code	Color Name
Lakeside AA0210	F0183	Milk
	F0184	Warm White
	F0185	Pebble
	F0186	Rich Gold
	F0187	Steel Gray
	F0188	Chocolate Brown
	F0189	Loden Green
	F0190	Deep Ocean
	F0191	Claret
	F0192	Jet Black
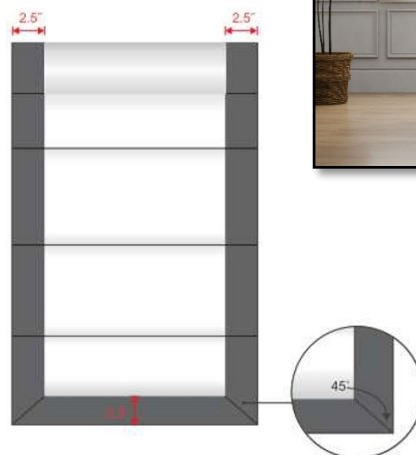

Lining Options

All shades must be lined to achieve the desired custom finished look. The two lining options are both white in color with the following transparency options:

- Blackout: 80% Polyester & 20% Cotton

- Translucent: 80% Polyester & 20% Cotton
  - Note: Effective immediately, the translucent liner fabric has changed in composition but not in color.

Translucent

Blackout

Please note there is a difference between the lining and the innovative Centerpiece lift system fabric. The lining is sewn directly to the back of the shade fabric while the lift system is the outermost fabric that is attached periodically to the lining to lift the shade onto the accompanying roller. This unique lift system eliminates the need for cords, shrouds, rings or grommets providing a cleaner appearance while being inherently child and pet safe.
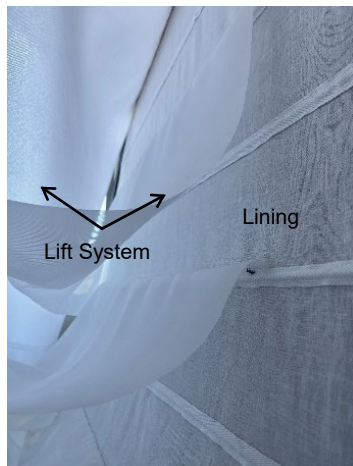

Size Considerations (Min/Max)

Lift System	Finished Size				Max Area
	Width		Length		
	Min	Max	Min	Max	
AeroLite™ Cordless	20"	96"	24"	96"	40 FT^2
Continuous Cord Loop	12"	50" for 1½" headrail 96" for 2" headrail	24"	96"	33 FT^2 for 1 ½" headrail 64 FT^2 for 2" headrail
SmartRelease™	12"	96"	24"	96"	52 FT^2
Motorization	20"	96"	24"	102"	68 FT^2
Cordless Day & Night	20"	96"	24"	96"	40 FT^2
Continuous Cord Loop Day & Night	12"	96"	24"	96"	64 FT^2
SmartRelease™ Day & Night	12"	96"	24"	96"	52 FT^2
Motorization Day & Night	20"	96"	24"	102"	68 FT^2

- All shades must meet the max area limitations.
- Day & Night shades cannot exceed length to width ratio of 3:1, due to telescoping.
- Headrail size:
  - For widths over 50", the 2" headrail will be used.
  - For side by side windows, all shades would be considered large. Therefore, the 2" headrail will be used on all shades.
- Railroading & Seaming:
  - See the complete fabric list for max fabric width and railroad & seam availability by the fabric.
  - If no Vertical Seams are desired, please refer to the following shade width limitations.

Max shade width <u>without</u> seams	AeroLite Cordless	Cordless Day/Night	Continuous Cord Loop, Continuous Cord Loop Day & Night, SmartRelease, SmartRelease Day & Night, Motorized, Motorized Day & Night
Flat Fold without Seams	Fabric width − 8 3/8"	Fabric width − 9 1/8"	Fabric width − 5 3/4"
Flat Fold with Batten Back (Sheer fabrics only)	Fabric width − 3 1/2"		
Flat Fold with Batten Back	Fabric width − 1 15/16"		
Soft fold	Fabric width − 2 7/16"		

- When railroaded, F0031 Black Gingham in the Lorraine collection cannot be seammed horizontally and will be limited to the following max heights.

Fabric Exception	Shade Style	Max Shade Height after Railroaded
F0031 Black Gingham, Lorraine AB0103	Flat Fold with Batten Back	36"
	Soft Fold	26"

General Specifications

Size Definition & Deductions

- Finished Shade Size
  - IB: Ordered Width - 3/8"
  - OB: Ordered Width
- Shade allowance: Width = +/- ¼"; Length = 0" to + ½"
- IB deduction for shades under a common valance:
  - Shade width = order width - 3/16" <u>for each shade</u>

Fabric Stack Heights & Fold Count

Flat Fold		Soft Fold	
Shade Height	Stack Height	Shade Height	Stack Height
24" to 28 5/16"	9 ½"	24" to 28 7/8"	9 ½"
28 3/8" to 44 5/16"	11 1/8"	29" to 44 7/8"	10 ¾"
44 3/8" to 64 5/16"	12 ½"	45" to 64 7/8"	12 ¼"
64 3/8" to 102"	14"	65" to 102"	13 ¾"

Shade Height	Soft Fold Count
Up to 36"	3.5
36 1/8" to 76"	5.5
76 1/8" to 88"	6.5
88 1/8" to 100"	7.5
100 1/8" to 102"	8.5

Continuous Cord Loop & SmartRelease™ Chain

- Control location:
  - Default: Right
  - Optional: Left
- Chain options:
  - Standard: plastic (white, ivory, black)
  - Upgrade: stainless steel (with surcharge)

	Order Length (Y)	Continuous Cord Loop (Chain Length)	SmartRelease™ (Chain Length)	
			Plastic Chain	Stainless Steel Chain
Default	12"Y≤30"	Order height - 3"	16"	16"
	30" <Y≤42"		24"	24"
	42"<Y≤54"		36"	36"
	54"<Y≤66"		48"	48"
	66"<Y≤90"		60"	60"
	Y＞90"		84"	84"
Optional		For both plastic and stainless steel chain: Custom length available as long as it is no shorter than default.	Optional lengths: 16"/24"/36"/48"/60"/84"	Custom length is available, as long as the length is 12" or longer.

- Chain length is measured from the top of the headrail to the bottom of the tension device.
- Chain length tolerance: 0~ + 1 9/16"

General Specifications

Motorization

- Radio frequency technology allows you to operate from virtually anywhere in the room.

- Operate multiple shades simultaneously or individually

- Available in single shade & Day & Night

- Low voltage motorization; no costly electronical hard-wiring

- Easy to program, with an easy to use 15-channel remote control

- Each shade must be assigned to its own channel

- Two power sources to choose from– battery wand and plug in AC

- Motor default on the right side of the shade. Optional: left

Motor/Remote	Specifications	
25 CE	• Used with battery wand (require 8 AA batteries/batteries not included) • Length of power cord is 12"; no plug • extension cord available in 2 lengths: 48", 96"	
25 TE	• Operating voltage: 110 to 240V • Power cord: available in 118" • With plug only	
15- channel remote control	• Each remote operates up 15 channels (15 Shades) • Preprogrammed at the factory • "0" channel is the default setting • Require 1 Lithium cell battery (CR 2450 (3V)); batteries are not included	

Mounting Depth Illustrations

	Flush IB	2 15/16"	

Railroading & Seaming

Please refer to the fabric list for railroad and seaming availability by the fabric.

Railroading
Some fabrics can be turned 90° clockwise (width for height) to accommodate wider windows. Once railroaded, the shade will be horizontally seamed to reach the desired ordered height. Horizontal seams are not as visible as they are made at the battens of a Flat Fold with Batten Back shade and at the sewing lines of a Soft Fold shade.
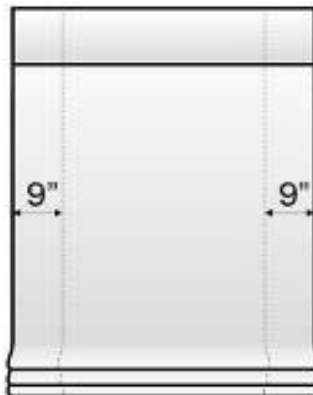

Exceptions:
1. Railroading is limited to Flat Fold with Batten Back and Soft Fold only.
2. Horizontal seaming is not available for Black Gingham F0031 in the Lorraine AB0103 collection. Special max shade height for this fabric can be found on the Size Considerations page.

Seaming (Vertical)
• When railroading is not available in select fabrics, vertical fabric panels will be joined together to reach the ordered width.
• The fabric panels on either ends will be a minimum of 9" in width, with the center panel varying in width based on the ordered width. This includes the valance, if a valance is specified.
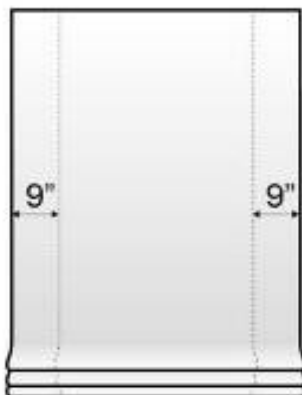

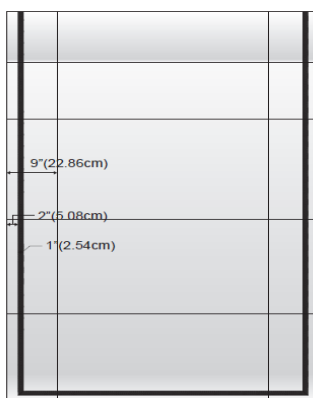

Shade with seams, no valance   Shade with seams with valance

• Note: For fabric AB0203 Ella when Ribbon Banded, shade widths above 55" will be seamed due to the fabric width limitation. The side panels will be 9" on each side, with the center panel varying in width. The ribbon will run 2" along the edges, which will be on the added 9" seam panels.

9"(22.86cm)

2"(5.08cm)

1"(2.54cm)

Day & Night Shades

- Available in Cordless, Continuous Cord loop, SmartRelease™ and Motorization lift systems
- Fabric options:
  - Front shade: select any current fabric from the Roman Shade Fabric Collection
  - Rear shade: select any current Soluna™ Roller shade fabric collection, except for the following:
    - Not available in A400 (1%), A400 (3%), Aruba, Bali and Samoa fabric collections
    - See complete roller fabric availability.

- Control/Motor Positions are not optional

Control Position:
Continuous Cord & SmartRelease:
Both front roman shade and rear roller shades are with continuous cord system

Control Position		
	Front Roman	Rear Roller
Default	Right	Left

Motor Position:
Motorized Day & Night:
Both front roman shade and rear roller shades are motorized

Motor Position		
	Front Roman	Rear Roller
Default	Right	Left

Hem Bar Options:

For the Rear (Roller) shade, choose from a Plain bottom rail (Standard), or a Fabric-Wrapped bottom rail (Optional).

FRONT – wrapped with fabric

BACK – plain

Plain bottom rail hem bar

**Fabric-wrapped bottom rail hem bar**

Valance & Valance Return Options

- No Valance (Standard)
- Valance (Optional)

(Flat Folds)

No Valance   Valance

(Soft Fold)

No Valance   Valance*****

- Valance height:
    - **Flat fold styles:** varies depending on the shade height (see chart to the right)
    - ***Soft fold style**: standard height; same height as the first fold

Shade Height	Valance Height
24" to 36"	6" to 7.6"
36 1/8" to 48"	6.8" to 8"
48 1/8" to 60"	7.7" to 8.6"
60 1/8" to 73"	8.2" to 9.3"
73 1/8" to 88"	8.7" to 9.8"
88 1/8" to 102"	8.7" to 9.6"

Note: Applies to flat fold only

Valance & Valance Return Options				
Default	**Optional**			
IM & OM	**Inside Mount**		**Outside Mount**	
No Valance and No Returns	Valance with wrapped returns	Valance with no valance returns	Valance with pleated returns	Wrapped returns only; no valance

**Side by Side: In order to match Side by Side shades, all shades must have the same valance and valance return type selected.

Common Valance

- 2 headrails under a shared valance
- Both shades must have the same height
- There is a minimum gap of 1/8" between shades. A maximum gap of 6" can be requested.
- Overall max width: 144"
- Not available for shades with banding options (Ribbon Banding and Edge Banding)

Min 1/8"   Max 6"
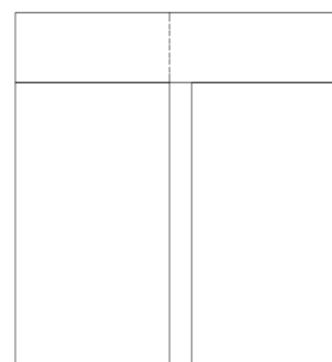

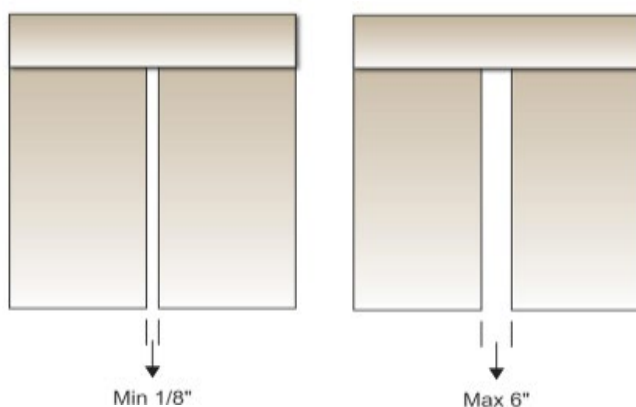

Seamed Valance

Note: When the valance width exceeds the fabric width, the valance will be seamed along the edge of the left shade.

Side By Side Roman Shades

Side by Side shades will match the batten seams, starting from the top of the shades and continuing down to the bottom of the shortest shade within the order*. Must be ordered at the same time and criteria must be identical in:
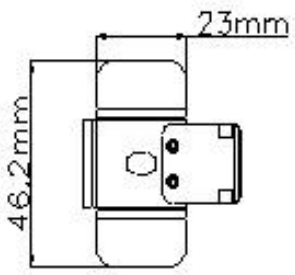

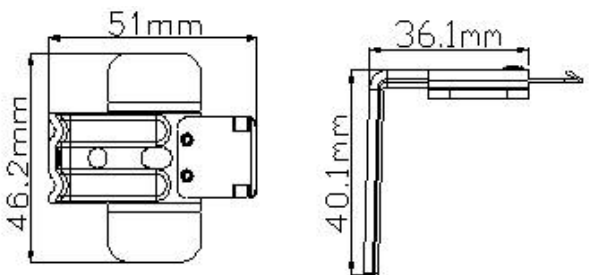

- Room
- Lift system
- Mount type
- Shade style & shade banding
- Fabric color & lining
- Valance type & valance return type

- Not available for Flat Fold without Seams.

- Side by side seam alignment will be within a 1/8" tolerance.

- We can't guarantee the battens will align unless side by side is selected.

- If the side by side option is not selected, even if order details are identical/or if ordered at different times, the tolerance is 7/16".
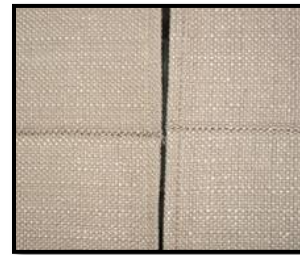

*Example: If multiple shades as a side by side have different order heights, the battens will align up to the end of the shortest shade. Subsequently, the remaining length on the longer shades would be adjusted within the last 1-2 panels. This means when the shades are fully raised, fabric stacks may appear slightly different.

Hardware & Accessories

Bracket Dimensions

Bracket for Inside Mount	23mm, 46.2mm
Bracket for Outside Mount	51mm, 46.2mm, 36.1mm, 40.1mm

Magnetic Hold-Down

- For Dual Roman Shades, the magnet will be pre-installed at the factory on the bottom bar of the rear shade.
- The magnet catch, which needs to be installed at the job site, can be found in the hardware box.
- Available for IM and OM
- Not recommended for metal door applications
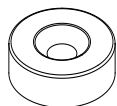

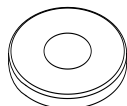

Magnet   Magnet Catch

Available colors for Magnet Catch
- Nickel-Plated (Default)
- (Optional) Pure White, Silk White, Bisque, Pearl, Bright Brass, Antique Brass, Black, Crisp Linen, String, Sea Mist, Stone Gray, Brown Gray, Taupe Gray

Left Side of the Shade

1 7/16" (37mm)

5/16" (8mm)

Bottom of the Shade or Window Sill
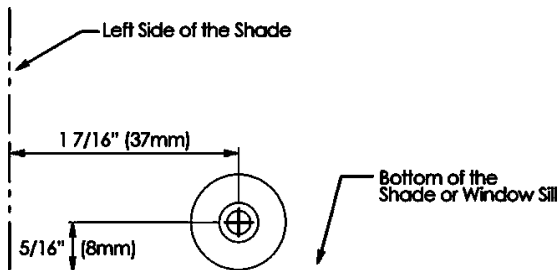

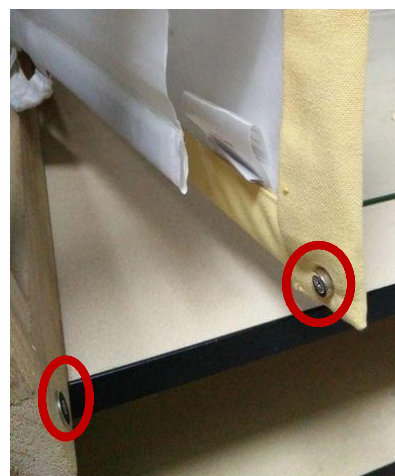

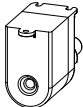

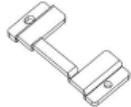

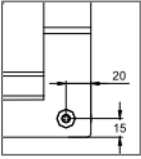

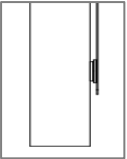

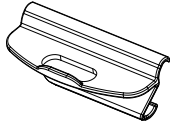

Allow extra wall space for installation of the magnet catch:
- 1 7/16" from the side edge of the shade
- 5/16" from the bottom edge of the shade or window sill

Fabric Notes:
1. When selecting sheer fabrics, blackout lining is recommended for AeroLite Cordless, Continuous cord loop, Motorization, and Day & Night. Translucent lining can be specified as an option- when specified as such, the concealment flap will be lined with blackout lining.
2. Fabric by the yard is available for Roman fabrics. (Max 10 yards) Please refer to the appendix in the Retail Guide for pricing.
3. Sheer fabrics are not available in Soft Fold shades.
4. 100% silk fabrics (Rochelle collection) are not available in Flat Fold without Seams.

Discontinued Roman Fabrics:

Fabric Information

Please note that all fabrics will adjust to the environment, and the environmental changes. These adjustments may include color fading, fabric stretching, fabric shrinkage, or other damages.

Color Variation
- Natural fabrics especially linen, cotton and silk are made from natural materials. Color lot variations may occur to fabrics due to varying rates of color absorption during the color application process. Slight imperfections and variations in color are all part of the natural beauty of this product and should be considered to be normal and acceptable.
- Colors may appear to vary depending on the time of day and lighting type under which the product is observed. The appearance of color variation may also occur if the shade is partially or fully lowered.
- All fabric colors gradually fade due to UV exposure. If a shade is left half open for a long time without being fully lowered regularly, the fabrics will fade unevenly. Fabrics will fade more evenly if shades are lowered during the day. Naturally, parts of the shades that are overlapped by another piece of fabric will not receive as much sun exposure, and thus the rate in which it fades will be slower than those parts that are more exposed.
- For the best color match, order all matching shades for a room at the same time. Pattern availability and color lot match between orders cannot be assured. Any variation in color is in accordance with industry standards.
- Light will penetrate through the pin holes of seams/stitching.
- Actual fabric colors may vary slightly from the images we provide.

Wrinkles
- Natural fibers, such as linen, cotton and silk, are fairly inelastic, tend to have wrinkles, and are prone to shrinkage. The tendency to wrinkle is often considered as part of the fabric's unique characteristic. If your Roman shades are wrinkled, hang the shade in a fully lowered position for a few days. It will help minimize the wrinkles, allowing them to usually disappear naturally.
- Disclaimer: Ironing fabrics labeled *Do Not Iron* may damage the fabric and will void the warranty.

Surface Imperfections
- Due to the nature of fibers and the weaving process, some "imperfections" such as slubs in the weave are normal and are not considered to be defects. Slubs in silk, linen and cotton are expected for their unique and natural beauty, and should not be considered to be defects.
- Imperfections on fabrics in longer lengths may occur. These are caused by the weaving process.
- There is a maximum of 10 yards for fabric by the yard as surface imperfections in longer lengths may occur. These imperfections will be marked with a label.

Asymmetry
- Due to the natural characteristics of fabrics, slight shrinkage and stretching may occur. Variations in size and shape of the shade are to be expected and deemed acceptable. These variations may cause slight asymmetry and may alter the appearance of the finished shade.
- Specifically, you may notice a slight variation in width and/or length on one of the shades compared to what was ordered. Even with shrinkage control in the manufacturing process, most linen, cotton, and silk fabrics tend to shrink during or after production. Thus, the width and length of the shade may have changed slightly after the shade has been in operation for some time. Washing the shade can further intensify this shrinkage.
- Width and length difference between different shades may occur due to fabric shrinkage and manufacturer tolerance. Thus the length of the shade and the segment height between two shades would be different, even if the shades were ordered as the same size.
- After the Roman shade has been installed, the weight of the fabric, the size of the shade and environmental factors can all affect the extent to which a shade will settle. Since this process is somewhat unpredictable, the final drop of the shade may vary by up to +/- 10mm. The shades may take 1 to 2 weeks of hanging to allow the fabric to drop to the required length.
- Weave skewing of fabrics is common during the weaving process. Pattern asymmetry can occur on patterned fabrics, where the pattern on the right side of the shade may not match up with the left.
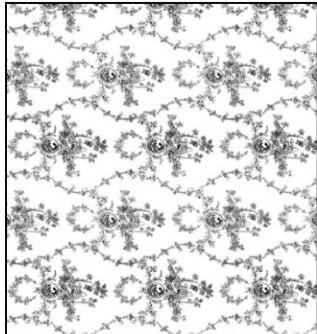

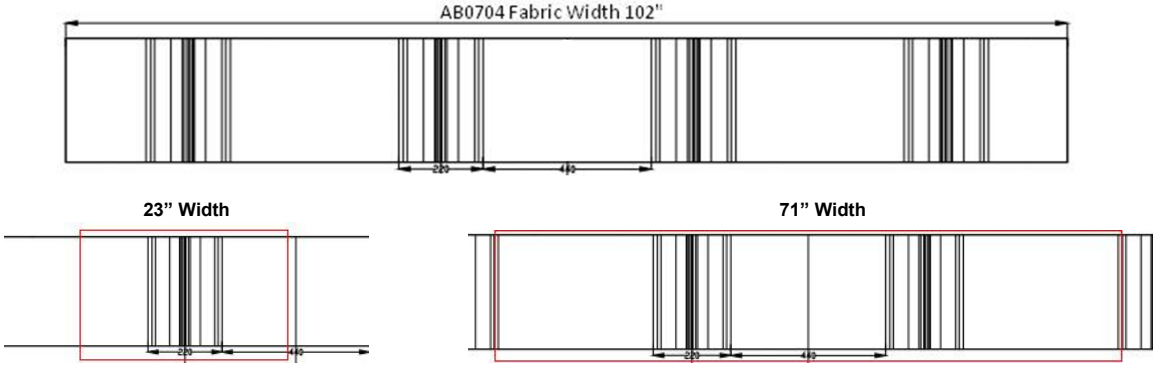

Fabric Information

Pattern Alignment

- Pattern alignment cannot be guaranteed from one shade to the next. All patterns are oriented differently on the fabric roll. The pattern alignment also depends on where the fabric has been cut on the roll.
- Patterned fabric will not be railroaded.
- Patterns on shades and valances may not be perfectly straight. Slight biases may occur.

Complete Fabric Patterns

Fabric	Full Fabric Pattern	Fabric	Full Fabric Pattern
AB0637 F1080 Snow White F1081 Field Drab F1101 Moss Green		**AC0401** F1082 Corn White F1083 Sea Green	
AC0402 F1084 Dim Gray		**AC0402** F1085 Dim Ecru	
AB0704 F1061 Sag Harbor 0006	 For Sag Harbor, the complete fabric width is 106" and the complete pattern repeat is about 26". The pattern is always kept centered for all shade widths but the patterns will align depending on the width of the shade. See below examples at around 23" & 71" in width. AB0704 Fabric Width 102" 23" Width 71" Width		

Decorative Pillow Covers

- Sheer Elegance AA0308
- Sheer / Sheer Elegance AC0401, AC0402
- Blake AA0213, AA0214, AA0215

Roman Shades

Routine cleaning will help maintain the beauty of your shade.

Proper ways to clean Roman Shades:
- Use a hand held vacuum to remove debris
- Use a duster to remove any light dust
- Spot clean by using a soft cloth or sponge moistened with lukewarm water. Add mild detergent, if needed. Blot gently to avoid creasing or damaging the fabric. Rubbing can damage the fabric.

Proper ironing for Roman Shades:
- Iron low to medium, if necessary
- Do not iron fabrics that are 100% silk, 100% linen/cotton blend, or 100% cotton, or have Translucent Lining
- For specific ironing instructions for each fabric, please refer to the Fabric Collection chart. Pages 21-24.
